Class 2

D and T

This week we have incorporated our Geography theme, with our recycled modelling, to create our own junk models. We have practiced different joining methods and even given our models a name!

Millie made a fantastic model named Barb.

Arran added textures to his model.

Oscar was keen to make his nearly as tall as him!

Harry decorated his robot with some great detail.

R.E. – Lent

This week we have been learning about the period of Lent. We have thought about what we could give up for Lent and what we could do to help someone.

Lent

During Lent, some Christians give something up. It might be chocolate, sweets or watching so much TV. Draw a picture of something you could give up. Then write a sentence explaining why you would give it up.

I will give up pancakes and chocolate spread so I can try something healthy to eat for breakfast.

Lent is a time when Christians help people. Draw a picture of you helping someone. Write a sentence explaining what you are doing to help.

I help my dad in the shed making shure the sheep have water and hay.

George wants to give up chocolate spread and pancakes!

Lent

During Lent, some Christians give something up. It might be chocolate, sweets or watching so much TV. Draw a picture of something you could give up. Then write a sentence explaining why you would give it up.

I would give up chocolate for lent because i eat too much and its bad for my teeth.

Lent is a time when Christians help people. Draw a picture of you helping someone. Write a sentence explaining what you are doing to help.

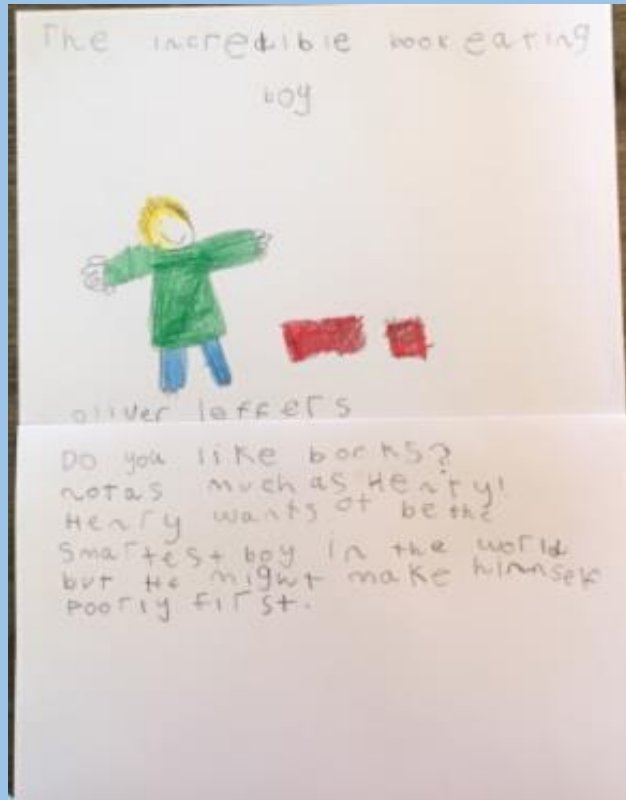

I am helping my mam to tidy my bedroom and do the dishes so she doesnt have to do it all because she does everything for all of us.

Logan wants to help his Mam in the house.

Literacy

In Literacy, we have made our own front covers and blurbs for our favourite Oliver Jeffers book.

Willow created a great front cover for, 'The incredible book eating boy.'

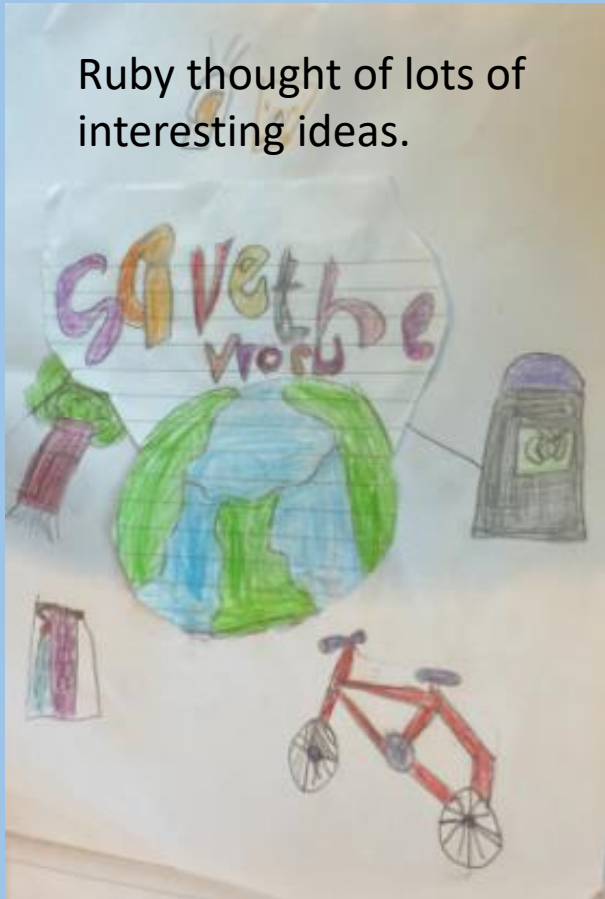

Jayden thought about his description to make his blurb exciting for the reader.

Geography Week

This week has been Geography week. We have been exploring climate change and recycling. We have produced pictures and posters to encourage people to support climate change and to recycle more.

Ruby thought of lots of interesting ideas.

Archie highlighted the importance of protecting the oceans.

Recycling your rubbish helps nature and animals not to get poorly because rubbish can pollute and damage our environment. If all of our rubbish wasn't recycled it would end up in landfills and would mean more trees would get cut down.

Recycling means we don't have to take more things like trees from the world. Taking things from the world makes air and water pollution. As recycling saves energy it also reduces climate change. UK recycling is saving more than 18 million tonnes of CO₂ a year which is the same as taking 5 million cars off the road.

Recycling also helps the country to create more jobs and save money. Instead of buying materials from another country, we can reuse the materials already in our country and help the economy.

Polly used ICT to create her poster.
