Seesaw Highlights

Class 5

RE - Origami

Lucy, George and Noah created some great origami models! Well done to Melody for sending a video of what she had created!

Geography

Mason came up with some great ways to help tackle Global Warming.

My Ideas to Tackle Global Warming

Look at each problem and note down some ideas that you could do in your own house as well as what could be done at a national and international level.

Cows making methane	Palm oil deforestation	Fossil fuels for energy	Pollution from cars and factories	Oil used for plastics
I could: I would not want to eat less beef but other people think this would help.	I could: find an alternative.	I could: use renewable energy like solar panels.	I could: Try and use electric cars.	I could: try and use less plastic and recycle more.
The Government could: Focus on bigger issues.	The Government could: encourage us to use an alternative to palm oil.	The Government could: make sure houses are energy efficient.	The Government could: Tell the factories to make more E cars.	The Government could: make it a law to recycle all plastic.
The world could: Work together to address bigger issues going on.	The world could: everybody look at alternatives.	The world could: get rid of coal power stations	The world could: Adapt electric cars.	The world could: could have a think on what they are putting in the bin and if it could be recycled.

RE – Shadow puppets

Amber and Travis created some fantastic shadow puppets!

GPS

Harley has been working hard this week, especially in GPS when looking at parenthesis!

- 1) I watched a horror film, in the dark, and it really scared me.
- 2) Dinosaurs (which are now extinct) were a type of reptile.
- 3) We're not allowed peanut butter (at all) in school because there's a girl allergic to nuts.
- 4) The bats, who come out at night, sleep in our attic during the day.
- 5) I lost my phone - under the seat - when I went on the rollercoaster ride.

- 6) We made popcorn (sweet and salty) for my birthday party.
- 7) Simone, who came from Spain, doesn't speak much English yet.
- 8) We were helping the Caretaker (Mr Longbottom) to carry all the chairs into the hall.
- 9) There aren't many apples left - on the tree - because we used them to make an apple pie.
