What did I learn about Habitats from John Hayton (Durham Wildlife Trust) last week?

WH

GW

What does an owl need in its habitat
in their habitat need

moorland because moorland is where
live

In their habitat an owl needs air because
they need to breathe with
air.

In their ~~an~~ owls habitat then
water because with out it a owl
dies.

What does a human need in their
habitat.

In their human needs in their habitat
oxygen because with out oxygen

will die. In this habit a human
needs water because with out water
you will be thirsty.
